DESCRIPTION:

Professional development has undergone three major advances in recent years– computers, the internet, and video. Based on the book *Focus on Teaching* (2014) by Jim Knight, this workshop describes how video can be used to support learning. Participants will learn the nuts and bolts of how to help teachers learn from video recordings of their lessons on their own, with an instructional coach, with teams, and as a part of teacher evaluation.

Learner Outcomes

- Participants will leave the session with forms to guide their use of video.
- They will also practice how data can be gathered to improve teaching and student outcomes through the use of video.
- Participants will be sent a copy of Jim's book *Focus on Learning*, when we can return to our offices.
